Claims 1 to 9 are pending.

Specification

1. The title of the invention is not adequately descriptive. A new title is required that is more clearly indicative of the invention to which the claims are directed. One possible title would be -- Permalloy Sensor Having Individual Permalloy Resist Pattern Runners With Lengths Perpendicular To A Wafer Level Anisotropy --.

Drawings

2. The drawings are objected to because the new drawing filed 8-26-2005 and labeled "prior art" is not referred to in the specification and it is not clear that the figure corresponds to the structure set forth by the remainder of the disclosure. The Examiner is aware of the possibility that the figure was associated with the present application by error of applicant or the Patent Office. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after

the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 to 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Higashi et al (U.S. 4,739,657) or Buchhold et al (U.S. 6,744,248) or Bohlinger (WO 99/61931). The references disclose plural permalloy resistors (which read on the claimed runners) on a silicon substrate, with some of the resistors running perpendicular to other of the runners and such an arrangement will provide a sensor anisotropy for at least some of the runners of about 90 degrees.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jefferson A. Evans whose telephone number is 571-272-7574. The examiner can normally be reached on Monday to Friday, 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Thi Nguyen can be reached on 571-272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
